

Sign our petition and tell EPA Administrator Scott Pruitt that enough is enough: it's time to #BootPruitt.

TO: EPA ADMINISTRATOR SCOTT PRUITT

Instead of doing your job to protect our health and environment, your tenure as EPA Administrator has been focused on fulfilling the toxic agenda of your industry cronies, making America more polluted and less safe.

By recklessly moving to dismantle critical health protections like the Clean Power Plan and clean water protections, rejecting standards that would reduce methane pollution, rolling back clean car standards, allowing dangerous chemicals to remain on the market, and advocating for the United States to abdicate its leadership role in the global clean energy economy, you undermine the mission of the EPA. Moreover, you have wasted tens of thousands of taxpayer dollars on first-class luxury travel, sparking investigations into your stewardship of the public trust and raising concerns among Congressional Republicans and Democrats alike.

It's clear where your priorities lie, Administrator Pruitt – with polluters and your political benefactors, not American families.

For your numerous ethical breaches, alarming dirty dealings with polluters and the irreparable damage that you've done to our health and environment, you must resign immediately.
